Hiring Team
Whatnot

Dear Whatnot Hiring Team,

I am writing to express my strong interest in the AI Tooling Engineer role at Whatnot. As a Founder & AI Systems Builder with a background spanning enterprise operations and zero-to-one product development, I specialize in taking complex, ambiguous business problems and turning them into working software, resilient AI workflows, and dependable system infrastructure.

At Novalyte AI, I conceived, architected, and deployed a multi-sided ecosystem connecting patient demand, specialty clinics, healthcare professionals, and service vendors. This required personally designing and shipping three core operational surfaces: public discovery and structured intake journeys, clinic onboarding tools, and a centralized operator Revenue Command Center. Hands-on, I engineered AI-enabled workflows covering prompt engineering, structured JSON schema outputs, tool calling, and automated database synchronization in Supabase, Postgres, and BigQuery.

I am particularly excited about Whatnot because of your focus on ai agents, automation & tooling. AI Tooling Engineer building internal operator consoles, LLM triage automations, and developer workflow enhancements for high-velocity marketplace ops. My direct experience with Internal Tools, AI Workflows, Python, TypeScript, React enables me to bridge technical solution design with fast, reliable execution and measurable operating impact.

I would welcome the opportunity to discuss how my builder mindset, systems thinking, and execution speed can support Whatnot's growth and product goals. Thank you for your time and consideration.

Sincerely,

Jamil Yakasai
