Hiring Team
Decagon

Dear Decagon Hiring Team,

I am writing to express my strong interest in the Agent Deployment Engineer role at Decagon. As a Founder & AI Systems Builder with a background spanning enterprise operations and zero-to-one product development, I specialize in taking complex, ambiguous business problems and turning them into working software, resilient AI workflows, and dependable system infrastructure.

At Novalyte AI, I conceived, architected, and deployed a multi-sided ecosystem connecting patient demand, specialty clinics, healthcare professionals, and service vendors. This required personally designing and shipping three core operational surfaces: public discovery and structured intake journeys, clinic onboarding tools, and a centralized operator Revenue Command Center. Hands-on, I engineered AI-enabled workflows covering prompt engineering, structured JSON schema outputs, tool calling, and automated database synchronization in Supabase, Postgres, and BigQuery.

I am particularly excited about Decagon because of your focus on forward deployment & ai implementation. Direct match for enterprise AI agent deployment, regression evaluations, CRM/ticketing integrations (Zendesk, Salesforce), and customer technical delivery. My direct experience with AI Agents, LLM Evaluations, Zendesk, Salesforce, Python enables me to bridge technical solution design with fast, reliable execution and measurable operating impact.

I would welcome the opportunity to discuss how my builder mindset, systems thinking, and execution speed can support Decagon's growth and product goals. Thank you for your time and consideration.

Sincerely,

Jamil Yakasai
