Hiring Team
Retell AI

Dear Retell AI Hiring Team,

I am writing to express my strong interest in the Forward Deployed AI Engineer role at Retell AI. As a Founder & AI Systems Builder with a background spanning enterprise operations and zero-to-one product development, I specialize in taking complex, ambiguous business problems and turning them into working software, resilient AI workflows, and dependable system infrastructure.

At Novalyte AI, I conceived, architected, and deployed a multi-sided ecosystem connecting patient demand, specialty clinics, healthcare professionals, and service vendors. This required personally designing and shipping three core operational surfaces: public discovery and structured intake journeys, clinic onboarding tools, and a centralized operator Revenue Command Center. Hands-on, I engineered AI-enabled workflows covering prompt engineering, structured JSON schema outputs, tool calling, and automated database synchronization in Supabase, Postgres, and BigQuery.

I am particularly excited about Retell AI because of your focus on forward deployment & ai implementation. Forward Deployed AI Engineer integrating voice agent APIs with customer CRMs, telephony backends, and live pipelines. My direct experience with Voice AI, WebSockets, REST APIs, Salesforce, HubSpot enables me to bridge technical solution design with fast, reliable execution and measurable operating impact.

I would welcome the opportunity to discuss how my builder mindset, systems thinking, and execution speed can support Retell AI's growth and product goals. Thank you for your time and consideration.

Sincerely,

Jamil Yakasai
