Hiring Team
Hippocratic AI

Dear Hippocratic AI Hiring Team,

I am writing to express my strong interest in the Forward Deployed Engineer role at Hippocratic AI. As a Founder & AI Systems Builder with a background spanning enterprise operations and zero-to-one product development, I specialize in taking complex, ambiguous business problems and turning them into working software, resilient AI workflows, and dependable system infrastructure.

At Novalyte AI, I conceived, architected, and deployed a multi-sided ecosystem connecting patient demand, specialty clinics, healthcare professionals, and service vendors. This required personally designing and shipping three core operational surfaces: public discovery and structured intake journeys, clinic onboarding tools, and a centralized operator Revenue Command Center. Hands-on, I engineered AI-enabled workflows covering prompt engineering, structured JSON schema outputs, tool calling, and automated database synchronization in Supabase, Postgres, and BigQuery.

I am particularly excited about Hippocratic AI because of your focus on healthtech product & workflow systems. Clinical AI agent deployments: embedding with health systems and clinics to configure conversational agents, safety guardrails, and EHR sync. My direct experience with Clinical AI Agents, LLM Guardrails, Patient Intake, Python, TypeScript enables me to bridge technical solution design with fast, reliable execution and measurable operating impact.

I would welcome the opportunity to discuss how my builder mindset, systems thinking, and execution speed can support Hippocratic AI's growth and product goals. Thank you for your time and consideration.

Sincerely,

Jamil Yakasai
