Hiring Team
AI Fund

Dear AI Fund Hiring Team,

I am writing to express my strong interest in the Product Builder role at AI Fund. As a Founder & AI Systems Builder with a background spanning enterprise operations and zero-to-one product development, I specialize in taking complex, ambiguous business problems and turning them into working software, resilient AI workflows, and dependable system infrastructure.

At Novalyte AI, I conceived, architected, and deployed a multi-sided ecosystem connecting patient demand, specialty clinics, healthcare professionals, and service vendors. This required personally designing and shipping three core operational surfaces: public discovery and structured intake journeys, clinic onboarding tools, and a centralized operator Revenue Command Center. Hands-on, I engineered AI-enabled workflows covering prompt engineering, structured JSON schema outputs, tool calling, and automated database synchronization in Supabase, Postgres, and BigQuery.

I am particularly excited about AI Fund because of your focus on founding builder & early-stage product roles. Direct fit for rapid 0-to-1 AI product incubation: taking ambiguous user problems, prototyping LLM workflows, designing UX/UI, and validating product-market fit. My direct experience with Applied AI, 0-to-1 Prototyping, LLM Workflows, Python, TypeScript enables me to bridge technical solution design with fast, reliable execution and measurable operating impact.

I would welcome the opportunity to discuss how my builder mindset, systems thinking, and execution speed can support AI Fund's growth and product goals. Thank you for your time and consideration.

Sincerely,

Jamil Yakasai
