JAMIL YAKASAI

TECHNICAL FOUNDER • AI REVENUE SYSTEMS ARCHITECT • GTM OPERATIONS

San Francisco, CA • jamil@novalyte.io • 415-918-1995 • linkedin.com/in/sanbosay

PROFESSIONAL SUMMARY

Forward-thinking Technical Founder and Systems Architect with extensive experience building AI-powered revenue systems and orchestrating Go-to-Market (GTM) execution. Strong at bridging engineering and revenue operations, transforming messy market signals into structured data, and deploying autonomous workflows that unify the entire customer lifecycle and pipeline execution across product, engineering, and sales teams.

CORE COMPETENCIES

AI & TECHNICAL WORKFLOWS

Custom ABM Systems, AI Revenue Architecture, Autonomous Agents, Structured Data Extraction, LLMs, Pydantic, Instructor Framework, System Architecture, Workflow Automation, API Integrations

REVENUE SYSTEMS & GTM

Go-to-Market Strategy, Unified Revenue Platforms, Account-Based Marketing, Pipeline Design, Deal Risk Assessment, Funnel Optimization, Lead Qualification, Commercial Systems Thinking

STRATEGY & OPERATIONS

Business Operations, RevOps, Strategic Planning, Cross-Functional Leadership, Process Improvement, Operational Scaling, 0-to-1 Execution, Strategic Decision-Making

DATA & ANALYTICS

CRM Architecture, Salesforce, SQL, BigQuery, Executive Dashboards, Predictive Forecasting, Data Quality, Insight Generation, Google Cloud Infrastructure

PROFESSIONAL EXPERIENCE

Novalyte AI

Jan 2024 – Present

Technical Founder & CEO | San Francisco, CA

Architecting a unified, AI-powered operating system for the men's health clinic sector, integrating prospecting, patient acquisition, and revenue pipelines into a single platform.

- **AI Revenue Architecture:** Designed and deployed autonomous Go-to-Market workflows to eliminate manual CRM management. Wrote the backend using Python, Pydantic, and the Instructor framework for strict, structured data validation of leads and market signals.
- **GTM & ABM Engine:** Developed an end-to-end intelligent patient acquisition marketplace that ingests industry-specific signals and translates them into predictive, high-conversion outbound campaigns that automate the customer acquisition lifecycle.
- **Operational Scale & Analytics:** Architected a centralized CRM Command Center backed by BigQuery, unifying clinic discovery, autonomous voice agents, and real-time revenue forecasting to manage a live pipeline of 500+ active enterprise accounts.

Zendesk | Enterprise GTM Platforms

May 2023 – Feb 2025

Sales Operations and Business Development | San Francisco, CA

Supported North American enterprise sales teams with a focus on cross-functional alignment, unified revenue systems, and pipeline discipline.

- **Process & Systems:** Engineered and optimized Salesforce architectures, translating raw sales inputs into predictive forecasting metrics and actionable executive dashboards.
- **Cross-Functional Alignment:** Served as the operational bridge between Sales, Marketing, and Ops to smooth out lead handoff friction and establish a unified source of truth for revenue data.
- **Data Quality & Deal Risk:** Cleaned legacy data and implemented structured pipeline visibility, helping leadership identify bottlenecks and make data-informed interventions on stalled deals.

EDUCATION

Maestro AI University | Entrepreneurship & Innovation in Artificial Intelligence — Dec 2026

Scholarship-funded

Georgia State University | Bachelor of Arts in Psychology — Graduated
