JAMIL YAKASAI

MEMBER OF TECHNICAL STAFF • AI SYSTEMS, DATA ENGINES & AUTOMATION

San Francisco, CA • 415-918-1995 • mrjamilyakasai@gmail.com • linkedin.com/in/sanbosay

PROFESSIONAL SUMMARY

Technical Founder and AI Systems Engineer with 5+ years building 0-to-1 data ingestion pipelines, autonomous LLM reasoning architectures, and production integrations. Combines Python, SQL, TypeScript, Supabase, BigQuery, and MCP services to turn complex, ambiguous unstructured business signals into structured reasoning engines, delivering high-reliability software directly to enterprise clients.

CORE COMPETENCIES

AI & MODEL ORCHESTRATION
LLM reasoning pipelines, autonomous agents, prompt & system design, structured data validation, Pydantic, MCP services, Gemini/Vertex AI

DATA SYSTEMS & INGESTION
Python, SQL, TypeScript, Supabase/Postgres, BigQuery, ETL pipelines, event streaming, REST APIs, webhooks, structured data extraction

SYSTEMS & ARCHITECTURE
0-to-1 product architecture, API layers, middleware, service boundaries, data reconciliation, distributed queues, performance telemetry

ENTERPRISE DELIVERY & GTM
Client-facing technical scoping, CRM integrations, executive dashboards, rapid prototyping, cross-functional roadmap execution

PROFESSIONAL EXPERIENCE

Novalyte AI
Jan 2024 – Present

Technical Founder & AI Systems Architect | San Francisco, CA

Architecting a unified 0-to-1 AI intelligence platform and data ingestion engine connecting prospect discovery, signal reasoning, and automated pipelines.

- **AI Intelligence Engine:** Designed and deployed end-to-end reasoning pipelines using Python, Pydantic, and structured LLM validation to transform unstructured market signals into deterministic decision data.
- **Cloud Run MCP Services:** Developed scalable Cloud Run-ready MCP agent tools for autonomous entity discovery, multi-source signal extraction, intent scoring, and programmatic action routing.
- **Data Ingestion & Infrastructure:** Centralized high-volume data sync across Supabase/Postgres, BigQuery, and REST APIs, maintaining real-time telemetry, error handling, and automated reconciliation.
- **0-to-1 Product Ownership:** Partnered with enterprise users to iteratively define requirements, build API connectors, ship production features, and deploy high-reliability automations.

Zendesk | Enterprise Platforms
May 2023 – Feb 2025

Sales Operations & Business Systems Analyst | San Francisco, CA

Supported North American enterprise teams with a focus on system integrations, pipeline telemetry, and data quality.

- **Systems & Forecasting Architecture:** Engineered automated Salesforce workflows, custom integration points, and SQL queries to convert raw operational inputs into executive forecasting models.
- **Data Quality & Pipeline Health:** Cleaned enterprise datasets, resolved sync latency, and built structured reporting dashboards to detect pipeline friction and bottlenecks.
- **Cross-Functional Alignment:** Collaborated with engineering, operations, and leadership to establish a single source of truth for commercial data across multiple platform tools.

SolarCity
Mar 2021 – Feb 2023

Inside Sales Representative | Oakland, CA

- Managed customer discovery, technical qualification, and CRM pipeline progression.

EDUCATION

Georgia State University | Bachelor of Arts, Psychology — Graduated

Maestro AI | Applied Science Program in Business Administration, Entrepreneurship & Innovation — In Progress
